

# **POMA** -vibrating-Compacting-Plate RP 220

## **The ideal supplement to the POMA-Grader SK 225**

The machine is mounted on the 3-point-linkage cat. I or II of any tractor with a power take-off. Two vibrating plates give best performance in compacting jobs. Besides this the equipment makes final grading. Since the unit is designed as a 2 plate compactor, it is possible also to work on rounded gravel roads.

The drive goes via PTO-shaft, angle-gearbox and v-belts.

Rubber buffer prevent vibration to be translated to the tractor. Vibrations have a high impact to the ground. The POMA-Vibrating-Compacting-Plate RP 220 is useful for roadbuilders and for landscaping companies.

### **Specifications:**

Working with:	2200 mm
Weight:	860 kp
Drive:	Power-take off 540 rpm
Mounting:	3-point hitch cat. I and II
Frequency:	50 Hz
Working speed:	400-2000 m/h
Impact force:	2 x 20 KN
