

PÖMA – Vibratory – Roller ARW 200

For graders and tractors from 120 – 200 HP

The PÖMA – ARW 200 is developed for compacting jobs in connection with road construction and maintenance work. The machine is working very economic on roads for forestry and agriculture.

The 2 Rollers adjust automatically to the rounded road profile so the compacting is very good.

The air cooled diesel engine drives via hydraulic pump and 2 hydraulic motors the vibration units. Starting and stopping of the engine is possible directly from the driver's seat via cable. Thanks to the rubber puffer the vibration of the frame is very low. The lifetime of the machine is very high.

Specifications	Engine power	29 KW at 2500 RPM
	Fuel tank	150 l
	Working width	2,1 m
	Total width	2,5 m
	Total length	3,91 m
	Impact force	2 x 53 kN
	Amplitude	1,5 mm
	Frequency	up to 40 HZ
	Working speed	1 - 3 km/h
	Weight	6,5 t
